Part 4: Questions 31-37

Complete the summary below. Write **NO MORE THAN TWO WORDS** for each answer.

Everyday the human body is fighting off (31) by destr	uctive pathogens. A person in good health has natural protection in
the form of an immune system which works best against familiar mid	croorganisms which may have been encountered during a
previous (32) or passed on by the mother before or a	iter birth.
Vaccination is a way to cause (33) immunisation by ir	ntroducing a small amout of pathogen into the body – just enough for
the body's (34) to react by making antibodies. Passiv	e immunization can be used as a way of treating someone who is
already sick. Proteins from animal (35)	d into the patient to give him the necessary antibodies to fight the
disease.	
Dr. Edward Jenner observed that people who had suffered and reco	overed from a serious disease called smallpox did not get it again. He
also noted that victims of milder disease, cowpox which they caugh	t from (36) were immune to smallpox. He carried out a
successful (37) by deliberately giving a child cowpox	in order to make him immune to smallpox.

Questions 38-40

Complete the diagram below. Choose your answers from the box below and write the letters A-F next to questions 38-40.

A antibody
B agglutination
C antigen
D germs
E plasma
F B-lymphocyte
